

eMagine Category 3d Environment

File Descrip _____ Judge _____ Entry # _____ Environment

A scene that has themed elements (i.e. a field with flowers, trees in the distance, clouds in the sky, dandelion fluffs floating by). Camera tours the environment in 30s to one minute. Music is a required element.

Please refer to website for specific submission formats <http://www.eravens.net/emagine/categories.html>

Evaluation points	5	3	1
Modeling or illustration	<p>Modeling is appropriate to landscape: bumpy but not jagged, where needed. Ground is not a straight edge around structures. (unless street or sidewalk). Buildings and structures are not the focus, but rather how they fit into the given environment (field, city, garden, outerspace), sky and atmosphere have also been shown consideration.</p> <p style="text-align: right;">_____pts</p>	<p>Modeling is mostly appropriate to landscape Ground, sky and mood have not been fully considered. Not everything quite fits the scene.</p> <p style="text-align: right;">_____ pts</p>	<p>Needs more done to the modeling. Really awkward elements.</p> <p style="text-align: right;">_____pts</p>
Texturing or shaders	<p>Textures are proportional to the surface, show appropriate or visually interesting application. No distortion.</p> <p style="text-align: right;">_____pts</p>	<p>Textures are somewhat appropriate, but could use more careful mapping. Colors are not as carefully considered as they could be.</p> <p style="text-align: right;">_____pts</p>	<p>Used all shaders with no specific show of consideration of surface. And/or textures were very random & disproportionate to the surface.</p> <p style="text-align: right;">_____pts</p>
Lighting or light source	<p>Lighting is proper for the type and mood of the scene.</p> <p style="text-align: right;">_____pts</p>	<p>Lighting is proper for the type & mood of the scene. But not consistent or well-done throughout the whole tour</p> <p style="text-align: right;">_____pts</p>	<p>Obvious default lighting. No lights or attention to extra lighting or mood has been demonstrated.</p> <p style="text-align: right;">_____pts</p>
Tour/Animation	<p>Has a good pace as the viewer is “toured” around the environment. Camera movements use principles of animation. Has music that fits the scene.</p> <p style="text-align: right;">_____pts</p>	<p>Has a good pace and, for the most part, speeds up and slows down appropriately to the action. Uses some principles. Music is ok but not a perfect fit.</p> <p style="text-align: right;">_____pts</p>	<p>Either the timing is not appropriate to the action, the music just doesn’t work or a combination of both.</p> <p style="text-align: right;">_____pts</p>

Tie-Breakers (1 point each)

_____ Has credits (Site Sources of Art, video or music)

_____ Ultimate break: Whomever mailed their entry first..

_____ Tie-breaker total
