

## eImagine Category 3d Mechanical Rubric

File Descrip \_\_\_\_\_ Judge \_\_\_\_\_ Entry # \_\_\_\_\_ Mech \_\_\_\_\_

Mechanical is defined vehicle, building or machine. Examples would be cars, *original* architecture, or an engine. (Humanoid robots would fall into the walk cycle or story catagories) etc. Not people, animals or landscapes. Music is a nice touch and will be counted in the event of a tie breaker. 300frames at 24fps

Evaluation points	5	3	1
<b>Modeling or illustration</b>	Modeling is smooth but not over modeled. No stray edges or vertices apparent. Good representation of the item (stylized or realism) _____pts	Modeling is is ok but has some problems proportionally or Not quite as visually appealing _____pts	Needs more done to the modeling. Has obvious errors in proportion or or structure, Stray vertices. _____pts
<b>Texturing or shaders</b>	Textures are proportional to the surface, show appropriate or visually interesting application. No distortion. _____pts	Textures are not perhaps appropriate, but could use more careful mapping Not as carefully considered as it could be. _____pts	Used all shaders with no specific show of consideration of surface. And/or textures were very random & disproportionate to the surface. _____pts
<b>Lighting or light source</b>	Lighting is proper for the type and mood of the object. Well-lit for detail/contrast. _____pts	Lit on all sides but not correctly or strongly enough. Poor contrast. _____pts	Obvious default lighting. No lights or the back side of the rotating object is dark. Or extreme lighting. _____pts
<b>Animation</b>			
<b>360 spin</b>	Smooth and has appropriate timing. Extra animation within the spin to show parts or assembly. _____pts	Yes but timing is too fast or too slow. _____pts	No spin or random views. _____pts
